SUMMARY

As a dedicated Front-End Developer, I am focused on bringing seamless web experiences through a solid understanding of HTML, CSS, JavaScript and ReactJS.

PROJECTS

1. Boat Website Clone

The Boat website clone is a fully responsive and modern e-commerce platform. It showcases various electronic products such as headphones, speakers, wearables, and other accessories. The clone features an interactive product grid, advanced filtering options, detailed product pages with reviews, and a dynamic cart system.

Features:

- User Authentication
- Filtering Products
- Dynamic Search Functionality
- Cart Functionality
- Color Selection Feature
- Custom Animations and Transitions

Tech Stack:

ReactJS | JavaScript | HTML | CSS | Tailwind CSS | Firebase | Paypal | JSON-Server

2. Death Wish Coffee Website Clone

This project is a website inspired by Death Wish Coffee, featuring a dark, bold design that matches the brand's identity. The website is fully responsive, ensuring an optimal viewing experience on both desktop and mobile devices.

Features:

- User Authentication
- Cart Functionality
- Filtering Products
- Responsive also

Tech Stack:

HTML | CSS | JavaScript | Bootstrap | JSON-Server

3. To do List Project

This is a user-friendly to-do list application designed to help users manage tasks efficiently. Users can add, edit, update and delete tasks while marking them as completed once done.

Features:

- Task Management
- Real-time Updates
- User-friendly Interface

Tech Stack:

ReactJS | JavaScript | HTML | CSS | Tailwind CSS | JSON-Server
